

Brian Wonjun Lee

Philadelphia, PA | 215-294-7152 | leebwj@sas.upenn.edu | leebrian.dev | linkedin.com/in/brian-lee-0b706b225

EDUCATION

University of Pennsylvania

BA in Computer Science & Design (Double Major), Benjamin Franklin Scholars

Philadelphia, PA

Expected May 2027

Relevant Coursework: User Experience (UX) and User Interface (UI) Design, Interactive Computer Graphics, 3-D Computer Modeling

EXPERIENCE

Software Engineer Intern

Aleph Lab (Y Combinator)

June 2026 – Present

San Francisco, CA (Remote)

- Built a deterministic Figma-to-React Native pipeline at a 4-engineer YC startup, turning designs into tokenized Expo code
- Designed declarative mode-authoring tooling (schema + conformance linter) so new AI game modes ship as data, not code
- Prototyped child-friendly notification and error-state UX (warm copy, recovery paths, observability) for a kids' English-learning app

Software Engineer Intern

BitMango (Puzzle1 Studio)

June 2025 – Aug 2025

Pangyo, South Korea

- Resolved 100+ QA-reported bugs across a live portfolio of 50+ Unity titles, shipping prefab and C# fixes in production
- Upgraded SDKs and platform modules fleet-wide to meet evolving app-store requirements and sustain production availability

Project Lead & Product Designer

Penn Spark (Red Team)

Jan 2025 – Present

Philadelphia, PA

- Led a 15+-person cross-functional team of designers and developers to ship client-facing 0-to-1 products
- Shipped polished, user-centered features across semester-long client project cycles

Military Interpreter

Capital Defense Command (ROK Army)

Dec 2022 – June 2024

Seoul, South Korea

- Provided real-time English-Korean interpretation and translated sensitive briefings in high-security, multi-agency environments

Database Engineer Intern

IT-Farm

June 2022 – Aug 2022

Seongnam, South Korea

- Designed and implemented a SQL database prototype managing 1M+ data entities using Oracle and SQLite
- Processed and organized semiconductor datasets from 20+ client companies, including Samsung, SK, and LG

PROJECTS

[Path@Penn Redesign](#) | Figma

Feb 2026 – Mar 2026

- Redesigning Penn's course-registration portal across 4 connected surfaces (Dashboard, Course, Schedule, Degree) to fix visual overload and fragmented planning workflows
- Surfaced pain points through observational walkthroughs, student interviews, and a heuristic audit, then translated findings into a hi-fi Figma prototype

[Penn Spark Website Redesign](#) | Figma, Next.js, React

Sept 2025 – Dec 2025

- Led design direction across 10+ designers and developers for the club's public site, shipping a scalable, data-driven content system
- Restructured navigation and page hierarchy to improve clarity and discoverability across the browsing experience

[Wikipedia Mobile Redesign](#) | Figma

Apr 2026

- Redesigning Wikipedia's mobile experience across 5 sections (Home, Article, Search, Language, AI Chat) for how people read
- Ran 3 structured interviews and a survey, synthesizing insights and How-Might-We framing into lo-fi wireframes
- Usability-tested with 4 participants, folding findings (previews, search snippets, clearer AI framing) into the final prototype

SKILLS

Design: Product Design, UX/UI, Interaction Design, User Research, Usability Testing, Wireframing, Prototyping, Design Systems

Engineering: TypeScript, React, Next.js, React Three Fiber, C++, OpenGL/GLSL, Python, SQL

Tools: Figma, Photoshop, Illustrator, After Effects, Maya, Blender, Substance Painter, Unreal Engine 5, Unity, Git
