EDUCATION

University of Pennsylvania

MSE in Computer Graphics & Game Technology (CGGT), Submatriculation
BA in Computer Science & Design (Double Major), Benjamin Franklin Scholars

Philadelphia, PA

Expected May 2028

Expected May 2027

Relevant Coursework: User Experience (UX) and User Interface (UI) Design, Interactive Computer Graphics, Computer Animation, 3-D Computer Modeling, Interactive Concepts for Art & Design

EXPERIENCE

Software Engineer Intern, Aleph Lab (Y Combinator)

June 2026 – Aug 2026 · San Francisco (Remote)

- **Made a full rebrand cost users nothing to relearn** — information architecture shipped first, live to **100% of users**, so the layout was familiar before the **33-section** visual system flipped on, staged **25→50→100%** behind a kill switch
- **Cut the designer-to-engineer handoff out of the loop** — a deterministic **Figma-to-React-Native pipeline** turning designs into tokenized Expo components, shipped as a reusable team skill
- **Replaced the blank white screen users hit when the app crashed** with a branded recovery experience, plus shared error states in warm, kid-appropriate English and Korean
- **Reset onboarding priorities** by surfacing a mobile drop-off at **roughly half the desktop activation rate** in trial data nobody had segmented that way

Software Engineer Intern, BitMango (Puzzle1 Studio)

June 2025 – Aug 2025 · Pangyo, South Korea

- **Kept 50+ live Unity mobile titles shipping** across a summer of releases, holding UI/UX and gameplay stable
- **Cleared 100+ QA-reported bugs into production**, in Unity prefabs and C# across a portfolio no single engineer owned
- **Kept the portfolio compliant and in the stores** through a platform requirement change, upgrading SDKs fleet-wide

Project Lead & Product Designer, Penn Spark

Jan 2025 – Present · Philadelphia, PA

- **Shipped client-facing 0-to-1 products** leading a cross-functional team of **15+** designers and developers
- **Made design decisions once instead of per-person**, defining the end-to-end flows and reusable interface systems the team built inside
- **Delivered on every semester-long client cycle**, brief to user-tested release

Military Interpreter, Capital Defense Command (ROK Army)

Dec 2022 – June 2024 · Seoul, South Korea

- **Held coordination together across government and defense organizations** as real-time English–Korean interpreter in high-security, multi-agency settings
- **Carried exact meaning where an approximation would have changed what a partner believed it agreed to**, live and in sensitive briefings

Database Engineer Intern, IT-Farm

June 2022 – Aug 2022 · Seongnam, South Korea

- **Made semiconductor data from 20+ client companies queryable** — including Samsung, SK and LG — by designing a SQL database prototype managing **1M+ entities** in Oracle and SQLite
- **Cut retrieval time across large-scale datasets** by restructuring and optimizing the queries the team relied on

PROJECTS

Path@Penn Redesign | Figma

Feb 2026 – Mar 2026

- **Made course registration something students plan in rather than fight** — Penn's portal across **4 connected surfaces**, against visual overload and fragmented workflows
- **Grounded every change in observed behaviour** — walkthroughs, interviews and a heuristic audit, then a usability-tested hi-fi prototype

Penn Spark Website Redesign | Figma, Next.js, React

Sept 2025 – Dec 2025

- **Put the club's public site live at pennspark.org** — rebuilt from an ageing Gatsby stack to Next.js + React with a content system the team updates without an engineer, leading design across **10+** designers and developers

Wikipedia Mobile Redesign | Figma

Apr 2026

- **Redesigned Wikipedia mobile around how people actually read it** — 5 sections built on **3 reader personas** from structured interviews and a survey
- **Let testing overrule my instincts** — previews, search snippets and clearer AI framing all came from sessions with 4 participants, not the original design

SKILLS

Design: Product Design, UX/UI, Interaction Design, User Research, Usability Testing, Rapid Prototyping, Information Architecture, Design Systems

Engineering: TypeScript, React, Next.js, React Native (Expo), Node.js, Python, SQL, Git, Docker

Tools & AI: Figma (+ Figma MCP), Photoshop, Illustrator, After Effects, Maya, Blender, PostHog, Claude Code, Codex
